# CROSS ICE / HALF ICE HOCKEY

## **BENEFITS**

The benefits of cross ice/ half ice hockey are endless. Because without the comfort of open ice, kids have to rely on creative ways to stickhandle, skate, and out smart their opponent. It's been proven that kids who begin their hockey training in this environment develop a better foundation of skills and hockey instincts and enjoy the game more.

## **PRACTICING**

- Group sizes become smaller which means learning and teaching will become more effective.
- Drills designed according to the varying skill levels of players within the group are easier to organize.
- More puck contact resulting in improved puck control skills.
- More repetition in drills in one ice session.

## **ACTUAL GAME**

- Playing on a smaller rink results in increased puck possession time for each player.
- Individual technical skill develop more quickly.
- Each players activity increases greatly.
- Scoring skills are enhanced since the players have more shooting opportunities.
- The game is full of continuously changing situations.
- Hockey sense and understanding the principals of the game is being developed at a young age.
- The feeling of being an important part of the action increases because of the small size of the rink.

## **GENERAL SPIRIT OF PARTICIPATION AND FUN**

- More children get a chance to play ice hockey.
- More children will experience a feeling of success when playing hockey.
- The same exciting and fun environment as in a "real" game is created.
- More and less gifted children will benefit from close/tight action on the ice.
- Children are excited and motivated to continue playing hockey.
- Hockey will be more appealing and rewarding to a wider range of children and their parents.
